EXTENSION OF RESULTS No. BV11-345 C4-EXT CONCERNING TEST REPORT BV11-345 C

Requested by: **RECORD INDUSTRY**
ZI Les Triboullères
38460 CREMIEU
France

Purpose of the tests: Presence detector on rolling type doors.

Purpose of the extension: Extend the presence detection results to a new product reference.

- Validity:**
1. This extension of results is valid only when accompanied by the reference test report.
 2. It can be combined with other extensions that relate to the same test reports, after a notice from the approved laboratory.

Prepared in Grenoble, January 7 2016

The engineer responsible for the tests

Bruno CHEVALIER

This extension comprises: 2 pages	Only the complete reproduction of the reference test report and this extension allows for the use of the results and the verification of the conformity required for the validity of the item.
--	---

Description of the modifications: extension of the results depending of the type of detection cells.
